LanzaTech
Transforming Carbon. Making Products.
Where does your carbon come from?

©2022 LanzaTech, Inc. All rights reserved.
This presentation (together with relevant materials, if any, referred to in connection herewith, this "Presentation") is for informational purposes only. This Presentation shall not constitute an offer to sell, or the solicitation of an offer to buy, any securities, nor shall there be any sale of securities in any states or jurisdictions in which such offer, solicitation or sale would be unlawful. This Presentation has been prepared to assist interested parties in making their own evaluation with respect to a potential business combination between LanzaTech, Inc. ("LanzaTech", or the "Company") and AMCI Acquisition Corporation ("AMCI") and the related proxy statement/prospectus and other documents filed with the SEC upon request. By accepting this Presentation, you acknowledge and agree that all of the information contained herein or disclosed orally in connection with this Presentation is confidential, that you will not distribute, disclose and use such information, and any other information other than for the purpose of your firm's participation in the potential financing, that you will not distribute, disclose or use such information in any way detrimental to LanzaTech or AMCI, and that you will return to LanzaTech and AMCI, delete or destroy this Presentation upon request.

No representations or warranties, express or implied are given in or in respect of, this Presentation. To the fullest extent permitted by law in no circumstances will AMCI, LanzaTech or any of their respective subsidiaries, security holders, affiliates, representatives, partners, directors, officers, employees or agents be responsible for, or have any liability for, direct or indirect, or consequential, special, exemplary, punitive, or incidental damages in connection with or arising out of the use of this Presentation, its contents, its omissions, reliance on the information, the use made by others of information provided by you, or the information transmitted in relation thereto, or otherwise arising in connection therewith. Although all information and opinions expressed in this Presentation, including industry and market data, are third party industry publications and sources as well as from research reports prepared for other purposes, were obtained from sources believed to be reliable, they have not been independently verified by AMCI or LanzaTech's management. These statements are indicative, non-guaranteed, forward-looking statements (as defined under the United States Private Securities Litigation Reform Act of 1995) and are not predictions of actual performance. These information is subject to change. Some data are also based on the good faith estimates of LanzaTech and AMCI, which are derived from their respective views of internal sources as well as the independent sources described above. LanzaTech's forward-looking statements related to product performance, cost and product sales related projections are based upon and are subject to not limited but not necessarily limited to discussions with suppliers, customers and academic research organizations as well as the Company's first commercial scale system built and operating in China. In addition, this Presentation, does not purport to be inclusive or contain all of the information that may be required to make a full analysis of LanzaTech or the Proposed Business Combination. Viewers of this Presentation should each make their own evaluation of LanzaTech and the relevance and adequacy of the information and should make such other investigations as they deem necessary.

Nothing herein should be construed as legal, financial tax or other advice. You should consult your own advisers concerning a general explanation included in this Presentation cannot address, and are not intended to address, your specific investment objectives, financial situations or financial needs. Nothing contained herein shall be deemed a recommendation to any party to enter into any transaction or take any course of action.

In connection with the Proposed Business Combination, AMCI has filed with the Securities and Exchange Commission ("SEC") a registration statement on Form S-4 (the "Registration Statement") containing a preliminary proxy statement and a preliminary prospectus of AMCI, and after the registration statement is declared effective, AMCI will mail a definitive proxy statement/prospectus to its shareholders and security holders. Shareholders and other interested persons are urged to read the preliminary proxy statement/prospectus and the amendments thereto and the definitive proxy statement/prospectus and any other relevant documents filed with the SEC when they become available because they will contain important information about AMCI, LanzaTech and the Proposed Business Combination. When available, the definitive proxy statement/prospectus and other relevant materials for the Proposed Business Combination will be mailed to stockholders of AMCI as of a record date to be established for voting on the Proposed Business Combination. Shareholders will also be able to obtain free copies of the preliminary proxy statement/prospectus, the definitive proxy statement/prospectus and other documents filed with the SEC, once available, without charge, at the SEC's website located at www.sec.gov or by directing a request to AMCI Acquisition Corporation I, 600 Steamboat Road, Greenwich, CT 06830. AMCI, LanzaTech's directors and executive officers and other persons may be participants in the solicitations of proxies from AMCI's shareholders for the Proposed Business Combination and the other matters set forth in the registration statement. Information regarding AMCI's directors and executive officers is available with the heading "Management" in AMCI's final prospectus used in its initial public offering, which was filed with the SEC and is available free of charge at the SEC's website at www.sec.gov or by requesting a request to AMCI Acquisition Corporation I, 600 Steamboat Road, Greenwich, CT 06830. Additional information regarding the persons participating in the proxy solicitation and a description of their direct and indirect interests by security holdings or otherwise, is contained in the proxy statement/prospectus relating to the Proposed Business Combination.
If any of these risks materialize or AMCI’s or LanzaTech's assumptions prove incorrect, actual results could differ materially from the results implied by these forward-looking statements. There may be additional risks that neither AMCI nor LanzaTech presently know or that AMCI and LanzaTech currently believe are immaterial that could also cause actual results to differ from those contained in the forward-looking statements. In addition, forward-looking statements reflect AMCI's and LanzaTech's expectations, plans, or forecasts of future events and views as of the date of this Presentation. AMCI and LanzaTech anticipate that subsequent events and developments will cause AMCI's and LanzaTech's assessments to change. However, while AMCI and LanzaTech may elect to update these forward-looking statements at some point in the future, AMCI and LanzaTech specifically disclaim any obligation to do so. These forward-looking statements should not be relied upon as representing AMCI's and LanzaTech's assessments as of any date subsequent to the date of this Presentation. Accordingly, undue reliance should not be placed upon the forward-looking statements. Neither LanzaTech, AMCI, nor any of their respective affiliates have any obligation to update this Presentation.

Use of Projections
This Presentation contains projected financial information in connection with LanzaTech. Such projected financial information constitutes forward-looking information, and is for illustrative purposes only and should not be relied upon as necessarily being indicative of future results. The assumptions and estimates underlying such financial forecast information are inherently uncertain and are subject to a wide variety of significant business, economic, competitive, and other risks and uncertainties that could cause actual results to differ materially from those contained in the projected financial information. Actual results may differ materially from the results contemplated by the projected financial information contained in this Presentation, and the inclusion of such information in this Presentation should not be regarded as a representation by any person that the results reflected in such forecasts will be achieved. Neither AMCI's nor the Company's independent auditors have audited, reviewed, compiled or performed any procedures with respect to the projections for the purpose of their inclusion in this Presentation, and accordingly, neither of them expressed an opinion or provided any other form of assurance with respect thereto for the purpose of this Presentation.

Financial Information; Non-GAAP Financial Measures
The financial information and data contained in this Presentation is unaudited and does not conform to Regulation S-X or Regulation G. Accordingly, such information and data may not be included in, may be adjusted in, or may be presented differently in, any proxy statement/prospectus or registration statement or other report or document to be filed or furnished by AMCI with the SEC. Some of the financial information and data contained in this Presentation, such as EBITDA, adjusted EBITDA, adjusted EBITDA – invested capital, EBITDA margin, EBITDA/CAPEX, EV/EBITDA and EV/Adjusted EBITDA, has not been prepared in accordance with United States generally accepted accounting principles ("GAAP"). AMCI and LanzaTech believe these non-GAAP measures of financial results provide useful information to management and investors regarding certain financial and business trends relating to LanzaTech’s financial condition and results of operations. LanzaTech’s management uses these non-GAAP measures for trend analyzes, for purposes of determining management incentive compensation and for budgeting and planning purposes. AMCI and LanzaTech believe that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating projected operating results and trends in and in comparing LanzaTech’s financial measures with other similar companies, many of which present similar non-GAAP financial measures to investors. Management does not consider these non-GAAP measures in isolation or as an alternative to financial measures determined in accordance with GAAP. The principal limitation of these non-GAAP financial measures is that they exclude significant expenses and income that are required by GAAP to be recorded in determining these non-GAAP financial measures. In order to compensate for these limitations, management presents non-GAAP financial measures in connection with GAAP results. You should review LanzaTech’s summary unaudited financial information and LanzaTech’s audited financial statements, which are included in the registration statement and proxy statement filed with the SEC. A reconciliation of projected non-GAAP financial measures has not been provided as such reconciliation is not available without unreasonable efforts.

Trademarks
This Presentation contains trademarks, service marks, trade names, and copyrights of AMCI, LanzaTech, and other companies, which are the property of their respective owners. The use or display of third parties’ trademarks, service marks, trade names or copyrights in this Presentation is intended only for illustrative purposes and should not be regarded as a recommendation or endorsement or sponsorship of, or a relationship with, the trademark holders. Solely for convenience, the trademarks, service marks and trade names referred to in this Presentation may appear with the TM or SM symbols, but such references are not intended to indicate, in any way, that LanzaTech or AMCI will not assert, to the fullest extent permitted under applicable law, their rights or the right of the applicable licensor to these trademarks, service marks and trade names.

Preliminary Financial Information
LanzaTech reports its financial results in accordance with U.S. generally accepted accounting principles. All projected financial information and metrics in this presentation are preliminary. These estimates are not a comprehensive statement of LanzaTech’s financial position and results of operations. LanzaTech has no assurance that LanzaTech will achieve its forecasted results within the relevant period or otherwise. Actual results may differ materially from those estimates as a result of actual year-end results, the completion of normal year-end accounting procedures and adjustments, including the execution of LanzaTech’s internal control over financial reporting, the completion of the preparation and management’s review of LanzaTech’s financial statements for the relevant period and the subsequent occurrence or identification of events prior to the issuance of its financial results for the relevant period.

Participants in the Solicitation
AMCI and LanzaTech and their respective directors and executive officers may be considered participants in the solicitation of proxies with respect to the Proposed Business Combination. Information about the directors and executive officers of AMCI is set forth in the registration statement filed with the SEC (and will be included in the definitive proxy statement/prospectus). Information regarding the persons who may, under the rules of the SEC, be deemed participants in the solicitation of AMCI stockholders in connection with the Proposed Business Combination is set forth in the registration statement (and will be included in the definitive proxy statement/prospectus). Stockholders, potential investors and other interested persons should read the proxy statement/prospectus carefully before making any voting or investment decisions. These documents can be obtained free of charge from the sources indicated above.

Non-Solicitation
This Presentation shall not constitute a proxy statement or solicitation of a proxy, consent or authorization with respect to any securities or in respect of the Proposed Business Combination and shall not constitute an offer to sell or a solicitation of an offer to buy any securities, nor shall there be any sale of securities, in any state or jurisdiction in which such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction. No offer of securities shall be made except by means of a prospectus meeting the requirements of the Securities Act of 1933, as amended.
AMCI has Identified LanzaTech as a Market Leader in the CarbonTech Ecosystem

**Key Company Highlights**

**Established CarbonTech company** transforming carbon emissions to sustainable materials and sustainable aviation fuel (“SAF”)
- Disruptive synthetic biology (synbio) platform integrated with proven engineering and commercial-scale operations

**Profitable, scalable decarbonization solution** for industrial sectors today
- 3 commercial plants operating
- 6 additional plants under construction

**Capital-light, recurring revenue** licensing model

**Rapidly growing demand** for CarbonSmart™ chemicals from leading consumer brands and SAF from global airlines

**Founding shareholder of LanzaJet**, a leading SAF company spun out in 2020 and backed by British Airways, Mitsui, Shell, and Suncor

**Blue-chip commercial partners and investors**

**Exceptional management team** with proven execution capability

Global Fortune 500 Partners Deploying LanzaTech’s Technology

Key Partners

~$850mm invested by world class partners deploying LanzaTech’s technology, resulting in expected product capacity of ~700,000 mtpa (230 million gallons/year)

1. **ArcelorMittal**
   - LT
   - Plans for deployment of LanzaTech technology globally

2. **Shougang LanzaTech**
   - LT
   - Additional plants under construction, technology rollout across China

3. **Mitsui & Co.**
   - LT
   - Commercial project investor, including in SGLT plants, and offtaker

4. **BASF**
   - LT
   - Strategic partner for new LanzaTech chemicals

5. **Sekisui**
   - LT
   - Building LanzaTech’s first commercial MSW conversion facility, currently in plant startup commissioning; plans for deployment across Japan

6. **Suncor Energy**
   - LT
   - Active technology and project development partner

7. **Indian Oil**
   - LT
   - Building first refinery off-gas plant; plans for broad deployment

8. **LanzaTech Investor**

9. **LanzaJet Investor**

10. **Commercial Plant Partner**

LanzaTech’s Network of Trusted Investors and Partners Range from Industrial Emitters to Aviation Companies and Consumer Brands

Over $500M Raised from World Class Investors

"We have worked with LanzaTech for several years, know their leadership team well and understand the potential of their technology and the role it can play in not only helping us to decarbonize, but also in producing valuable products from our carbon bearing gases which can help the decarbonization of other sectors. Extending our relationship through this investment was therefore a natural next step and we are very pleased to now have an excellent CCU technology company within our XCarb™ innovation fund portfolio."

Pinakin Chaubal, ArcelorMittal
Chief Technology Officer

"The integration of LanzaTech’s gas fermentation technology into BASF’s Verbund enables us to take an important step towards a carbon-neutral circular economy."

Dr. Detlef Kratz, BASF
President R&D at BASF

"The LanzaTech process is important because this fuel takes waste, carbon-rich gases from industrial factories and gives them a second life – so that new fossil fuels don’t have to be taken out of the ground. This flight is a huge step forward in making this new technology a mainstream reality."

Sir Richard Branson, Virgin Atlantic
Founder of Virgin Group, following the first commercial flight using SAF from steel mill emissions

"We are capturing emissions before they pollute our atmosphere and are at the same time moving away from fossil-based materials."

Caspar Coppetti, On
Co-Founder and Executive Co-Chairman

Brookfield Partnership to Drive CCT Scale-Up and Catalyze Project Deployment within LanzaTech Co-Development Strategy

- **Brookfield Framework Agreement** unlocks sophisticated infrastructure capital to invest in projects and further validates the LanzaTech technology platform.

- **Capital-light solution** providing much-needed supply for the massive, immediate, and rapidly growing demand from CarbonSmart™ and SAF customers.

- 1,500k MT
  - (~500 million gallons)
  - Potential supply for SAF and CarbonSmart™ materials from these projects¹

- 5,000k MT
  - (~1.8 billion gallons)
  - Massive Demand Opportunity from LanzaJet alone by 2030

- In select identified opportunities, LanzaTech plans to deploy capital directly into projects (~$85mm total, representing ~5% of total capital required for those projects)

---

**Brookfield Partnership Revolutionizes LanzaTech Co-Development Strategy**

**+$500mm**
- Equity commitment to invest in CCT projects meeting pre-agreed milestones; LanzaTech participates in project upside

**Drives Revenue**
- LanzaTech receives its one-time and recurring project-related revenue

**Increased CarbonSmart™ and SAF Availability**

**Accelerant to Licensing Business**

**Increased Volumes from Diversified Feedstocks and Geographies**

**Increased CarbonSmart™ and SAF Availability**

**Brookfield**

**Broad Scope**
- Global focus enables broad deployment of CCT technology

**50% Offtake**
- LanzaTech eligible to take up to 50% of the offtake

Key Investment Highlights

**Clear track record**
of successfully deploying patented carbon capture and transformation (CCT) technology driving revenue growth in a massive global TAM supported by macro tailwinds

**CCT market leader**
built on the foundation of a world class synthetic biology platform delivering value at each stage of technology deployment, and providing significant recurring revenues

**Capital-light, licensing model**
generating attractive returns

**Profitable plant-level economics**
expected to drive technology deployment and accelerate growth

**Attractive entry valuation**
enabling opportunity to invest in a first of a kind CarbonTech company decarbonizing heavy industry, aviation, and consumer supply chains

LanzaTech will be the first carbon capture and transformation company to go public enabling industrial companies to make money from emissions and consumer brands to decarbonize supply chains
Business Model

Integrated and Complementary Business Model

Joint Development & Contract Research
- Leverages LanzaTech’s synthetic biology, AI, and machine learning expertise to develop new products
- Expands addressable product markets and drives demand for CCT facilities
- Facilitates LanzaTech’s continued investment in disruptive synthetic biology platform

Licensing of CCT Technology
- Combination of one-time and recurring revenues to deploy LanzaTech carbon capture and transformation (CCT) plants
  - One-time revenues - equipment, engineering and startup services
  - Recurring revenues - royalties, microbes and media sales, and software licensing

CarbonSmart™ Marketing
- Offtake from CCT plants to supply brands with sustainable products
- Upgrade products with conversion partners into a huge variety of drop in polymers, materials, and fuels

Source: LanzaTech management
LanzaTech Unit Level Economics

($ in millions)

- Each carbon capture and transformation plant generates a combination of both one-time and recurring cash flows to LanzaTech
  - **One-Time Cash Flows:** Engineering Services, Startup Services, and Equipment Sales
  - **Recurring Cash Flows:** Royalties from Licensing, Microbes & Media, Monitoring & Software, and CarbonSmart™ related marketing fees

Source: LanzaTech management. Plant economics vary by region, size, feedstock, etc. The above is intended to be exemplary of the unit economics of plants that are currently being engineered or constructed.
Customer Unit Level Economics

- Plant economics vary by region, feedstock, and chosen product.

- Economics are expected to be attractive for plant sponsor, exclusive of the benefit of carbon emission reductions.

- Further upside to plant economics from:
  - Feedstock costs represent up to 40% of cost structure; as cost of carbon increases, this is expected to decrease substantially.
  - Price of carbon abated is excluded.
  - Direct production of higher value chemicals.

LanzaTech’s 1st customer is building its 4th plant.

---

Source: LanzaTech management. Plant economics vary by region, size, feedstock, etc. The above is intended to be exemplary of the unit economics of plants that are currently being engineered or constructed. The Company expects to continue to innovate around its platform technology in order to reduce operating expense and capital expenditures, but those innovations are not reflected in these estimates.

Potential avoided cost of $10mm per annum to the plant assuming a carbon price of $100/mt.

¹ Assumes the $250mm minimum cash closing condition, and 2022E figure excludes $30mm attributable to ArcelorMittal Safe note investment in December 2021, which will convert (and be part of) PIPE proceeds.
Transaction Overview
### Detailed Transaction Overview

~$1.7bn Enterprise Value | ~$125mm PIPE as of March 7, 2022 | $50mm SAFE Investment as of October 3, 2022

### Transaction Highlights

#### Cash Sources
- AMCI II has ~$150mm cash held in trust
- PIPE of ~$125mm as of March 7, 2022 sourced from a diverse investor base
- SAFE Investment of $50mm as of October 3, 2022 from Brookfield

#### Valuation
- ~$1,734mm EV with strong balance sheet

Note: AMCI has agreements to sell ~20% of the Founders’ Shares to anchor investors subject to certain conditions.

1. Business Combination Agreement requires minimum net proceeds of $250mm to close. *Excludes interest earned in the trust. SPAC cash amount subject to change depending on the actual interest earned. Assumes no redemptions from AMCI stockholders. 2. Equity rollover calculated for purposes of the Merger Agreement as pre-money valuation of $1.7bn plus estimated pre-transaction net cash position of $85mm, plus $32mm of aggregate assumed warrant exercise price and aggregate company options exercise price. 3. PIPE size of ~$125mm as of March 7, 2022. *Assumes a Projected Financing and excludes impact of gross proceeds from Brookfield SAFE. 5. Calculated to reflect net cash position of $85mm consistent with equity valuation in the Merger Agreement and gross proceeds from the Brookfield SAFE. 5. Pro forma ownership based on $10.00 per share. Assumes no redemptions from AMCI stockholders. Assumes PIPE size of ~$125mm. Assumes Projected Financing. Excludes impact of Brookfield SAFE conversion into shares, 3.5mm private warrants, and 7.5mm public warrants.
Identifying the Comparable Universe: LanzaTech is a Global Leader in Sustainable Materials and Fuels

**Key Criteria for Defining Best Comps**

- Recognized adjacent industry leaders
- Huge addressable markets
- High-growth financial profile
- Disruptive technologies

**No perfect public comp available**

- Investors will triangulate across various leading Sustainable Materials Peers, Synthetic Biology Companies, and Disruptive Decarbonization Enabling Companies
- Market will focus on predictability of business, long-term growth, margin profile, and defensibility of competitive moat

Appendix
Certain Factors may have a material adverse effect on our business, financial condition and results of operations. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties that we are unaware of, or that we currently believe are not material, may also become important factors that adversely affect our business. If any of the following risks actually occur, our business, financial condition, results of operations and future prospects could be adversely affected. In that event, you could lose all or part of your investment. All references in this section to “we,” our or “us” refer both to the business of LanzaTech and its subsidiaries prior to the consummation of the proposed business combination and to the business of the post-business combination public company and its subsidiaries.

The list below has been prepared solely for the purpose of the private placement transaction, and solely for potential private placement investors, and not for any other purpose. Accordingly, the list below is qualified in its entirety by disclosures contained in future documents filed or furnished by LanzaTech and AMCI Acquisition Corporation II, Inc. (“AMCI”) or otherwise with respect to LanzaTech and AMCI, with the SEC, including the documents filed or furnished in connection with the proposed transactions between LanzaTech and AMCI. The risks presented in such filings may differ significantly from and be more extensive than those presented below.

Our business, results of operations and financial condition have been, and could continue to be, adversely affected by the COVID-19 pandemic.

We have incurred losses and anticipate continuing to incur losses.

The success of LanzaTech’s plant operations is significantly dependent upon the strong execution and operation of each project by the respective industry partner as we rely and expect to continue to rely, heavily on industry partners to effect our growth strategy and to execute our business plan. Our failure to successfully maintain and manage these relationships and enter into new relationships could delay our anticipated timelines, prevent the successful development and commercialization of products produced using our process technologies, negatively impact our financial results and prevent us from achieving or sustaining profitability.

Even if we are successful in entering into strategic partnering arrangements, there are a number of different arrangements that we can pursue, and there are no assurances that we will select and negotiate the best arrangements for us and our stockholders.

We have entered into and anticipate entering into non-binding letters of intent, side letters, memoranda of understanding, term sheets and other arrangements with potential industry partners and cannot assure you that such arrangements will lead to definitive agreements. If we are unable to complete these arrangements in a timely manner and on terms favorable to us, our business will be adversely affected.

We continue to face significant risks associated with our international expansion strategy.

Construction of our or our partners’ plants may not be completed in the expected timeframe or in a cost-effective manner. Any delays in the construction of plants could severely impact our business, financial condition, results of operations and prospects.

Failure to continuously reduce operating and capital costs for our and our partners’ facilities that deploy our process technologies may impact adoption of our process technologies and could severely impact our business, financial condition, results of operations and prospects.

Maintenance, expansion and refurbishment of our and our partners’ facilities, the construction of new facilities and the development and implementation of our new process technologies or new aspects of our existing process technologies involve significant risks.

Our commercial success may be influenced by the price of fossil feedstocks relative to the price of our waste based feedstocks.

Fluctuations in the prices of waste based feedstocks used to manufacture the products produced using our process technologies may affect our or our industry partners’ cost structure, gross margin and ability to compete.

Declines in the prices of feedstocks our competitors use to produce their products could allow them to reduce the prices of their products, which could cause us or our business partners to reduce the prices of the products produced using our process technologies. This could make it uneconomical for our partners to produce products using our process technologies.

If the availability of the waste based feedstocks used in our process technologies declines or competition for them increases, we or our business partners may experience delayed or reduced production or be required to raise the prices of the products produced using our process technologies, either of which could reduce the demand for the products produced using our process technologies and our revenue.

We compete in an industry characterized by rapidly advancing technologies, intense competition and a complex intellectual property landscape, and our failure to successfully compete with other companies in our industry may have a material adverse effect on our business, financial condition and results of operations and market share.

Technological innovation by others could render our technology and the products produced using our process technologies obsolete or uneconomical.

Our financial results could vary significantly from quarter to quarter and are difficult to predict.

Our financial projections may differ materially from actual results.

We may require substantial additional financing to fund our operations and complete the development and commercialization of the process technologies that produce each of our products or new aspects of our existing process technologies that produce each of our products, and we may not be able to do so on favorable terms.

If we are unable to manage our growth and expand our operations successfully, our reputation and brand may be damaged and our business and results of operations may be harmed.

If we lose key personnel or are unable to attract, integrate and retain additional key personnel, it could harm our research and development efforts, delay the commercialization of the new process technologies or the new aspects of our existing process technologies, delay the launch of process technologies in our development pipeline and impair our ability to meet our business objectives.
Risk Factors (Cont.)

No assurances can be given that the Projected Financing will occur or with respect to the actual size, timing and form of any such financing.

Even if we successfully develop process technologies that produce products meeting our industry partners’ specifications, the adoption of such process technologies by our industry partners may be delayed or reduced, or our costs may increase, due to customer qualification, negative life cycle assessment, or capital investment procedures.

Failure of LanzaJet to complete its initial facility or failure of third parties to adopt the LanzaJet process in their commercial facilities for the production of sustainable aviation fuel could result in us never owning a majority stake in LanzaJet and may severely impact our business, financial condition, results of operations and prospects.

LanzaJet has an exclusive license to some of our intellectual property related to sustainable aviation fuel. Our genetically engineered microbes may be subject to regulatory scrutiny and may face future development and regulatory difficulties. Ethical, legal and social concerns about genetically engineered products and process technologies that use genetically engineered microbes could result in an unexpected shortfall or surplus that could negatively affect our results of operations.

We may not be successful in identifying new market opportunities and needs and developing our technology platform, or process technologies to produce products to meet those needs, which would limit our prospects and lead to greater dependency on the success of a smaller number of target products. Our failure or the failure of our industry partners to realize expected economies of scale could limit our or our partners’ ability to sell products produced using our process technologies at competitive prices, negatively impact our ability to enter into other strategic arrangements and the potential for other industry partners to adopt our process technologies, and materially and adversely affect our business and prospects.

Our success is highly dependent on our ability to maintain and efficiently utilize our technology platform, and to effectively identify potential products for which to develop and commercialize new process technologies, and problems related to our technology platform could harm our business and result in wasted research and development efforts.

We expect to rely on a limited number of industry partners for a significant portion of our near-term revenue. We and our industry partners are subject to extensive international, national and subnational laws and regulations, and any changes in relevant laws or regulations, or failure to comply with these laws and regulations could have a material adverse effect on our business and could substantially hinder our and our partners’ ability to manufacture and commercialize products produced using our process technologies.

We may be subject to product liability claims, which could result in material expense, diversion of management time and attention and damage to our business, reputation and brand.

We and our industry partners use hazardous materials and must comply with applicable environmental, health and safety laws and regulations. Any claims relating to improper handling, storage or disposal of these materials or noncompliance with applicable laws and regulations could be time consuming and costly and could adversely affect our business and results of operations.

We may be subject to product liability claims, which could result in material expense, diversion of management time and attention and damage to our business, reputation and brand.

Ethical, legal and social concerns about genetically engineered products and process technologies that use genetically engineered supplies could limit or prevent the use of products produced using our process technologies and could limit our revenues.

Our genetically engineered microbes may be subject to regulatory scrutiny and may face future development and regulatory difficulties. Additionally, failure to obtain import permits for all relevant microbes in jurisdictions with our industry partners could adversely affect our business and results of operations.
Our government grants are subject to uncertainty, which could harm our business and results of operations.

The requirements of being a public company may strain our resources and divert management’s attention, and the increases in legal, accounting and compliance expenses that will result from being a public company may be greater than we anticipate.

Our management has limited experience in operating a public company.

We have identified material weaknesses in our internal control over financial reporting. These material weaknesses could continue to adversely affect the combined company’s ability to report its results of operations and financial condition accurately and in a timely manner.

If we experience a significant disruption in our information technology systems, including security breaches, or if we fail to implement new systems and software successfully, our business operations and financial condition could be adversely affected.

International sales by us and our industry partners expose us and our industry partners to the risk of fluctuation in currency exchange rates and rates of foreign inflation, which could adversely affect our results of operations.

Changes in interest rates and capital availability may impact investment and financing decisions by our industry partners, which could adversely affect our results of operations.

Any failure by us to manage acquisitions and other significant transactions successfully may have a material adverse effect on our results of operations, financial condition, and cash flows.

We believe our company culture has contributed to our success, and if we cannot maintain this culture as we grow and, in particular, become a public company, our business could be harmed.

Causes of supply chain challenges, including COVID-19, could result in delays or increased costs for us and our partners deploying our technologies.

We and our industry partners have a limited operating history utilizing our technology and different feedstocks, which may make it difficult to evaluate our future viability and predict our future performance.

We have not yet generated material revenues from marketing of CarbonSmart products and sale of equipment and our revenue forecast must be considered in light of the uncertainty and risks frequently encountered by companies in their early stage of development.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

Changes in U.S. and foreign tax laws could have a material adverse effect on our business, cash flow, results of operations or financial conditions.

Political and economic uncertainty, including changes in policies of the Chinese government or in relations between China and the United States, may impact our revenue and materially and adversely affect our business, financial condition, and results of operations.

Our operations in China are limited to our joint venture and the license of our process technology to our partners in China. Our ability or the ability of our partners to operate in China may be impaired by changes in Chinese laws and regulations, including those relating to taxation, environmental regulation, restrictions on foreign investment, and other matters.

Changes in China’s economic, political, or social conditions or legal system or government policies could have a material adverse effect on our business and operations.

We may be subject to risks that the Chinese government may intervene or influence our operations at any time.

Products produced by our process technologies compete with or are intended to displace comparable products produced using fossil resources. The market prices for these alternatively produced products and commodities are subject to volatility and there is a limited referenceable market for the more sustainable, waste based products that our process technologies enable.

Process performance at LanzaTech’s plants is dependent on the quality and quantity of the feedstock supplied from the host facility.

The deployment of the technology for alternative waste gas feedstocks can lead to unforeseen issues due to the change in the upstream industrial process.

Our patent rights may not provide commercially meaningful protection against competition, and we may be unable to detect infringement of our patents.

Differences and uncertainties with respect to legal systems outside the United States could adversely affect the legal protection available to us.
Risk Factors (Cont.)

We may not be able to operate our business without infringing the proprietary rights of third parties.

Trade secrets can be difficult to protect and enforce, and our inability to do so could adversely affect our competitive position.

If trade secrets are stolen, misappropriated or reverse engineered, others could use these designs to produce competing products.

If we are unable to prevent third parties from adopting, registering or using trademarks or otherwise violating our trademark rights, our business could be materially adversely affected.

We may not retain exclusive rights to intellectual property created as a result of our strategic partnering arrangements which could limit our prospects and result in costly and time-consuming disputes.

Some of our intellectual property may be subject to federal regulation such as “march-in” rights, reporting requirements and a preference for U.S. industry, and any such regulations could negatively impact our business and prospects.

We depend on certain technologies that are licensed to us. We do not control these technologies and any loss of our rights to them could prevent us from developing or selling our process technologies.

Any strategic partnering arrangement that involves the licensing of any of our intellectual property may increase our risks, harm our competitive position and increase our costs.

We may be involved in lawsuits to protect or enforce our patents or the patents of our licensors, or lawsuits asserted by a third party, which could be expensive, time consuming and unsuccessful.
